

STRAW, LOCAL RESSOURCES WITHOUT BORDERS

The European Strawbale Gathering -ESBG 2015- is the event which brings together European players in strawbale construction.

These days, which are held every two years in a different country, will be held this year **in Montargis** (45) on CNCP-Émile Feuillet (National Center of Strawbale Construction) site and high school (lycée en forêt), **from August 20 to 25**.

A sharp program coordinated by the RFCP (French Network of Strawbale Construction) and led by speakers from eighteen different nationalities, will stimulate reflections on straw construction in Europe and the world.

In the program:

- **From Thursday, August 20, "Tour"** the participants of the opening day will be able to go to Paris for a visit and surroundings of buildings, public and private, built of strawbales.
- **Friday, August 21, "Straw goes Professional":** panorama of presentations of the techniques in Europe and worldwide; advanced experiments to an international level, theory and physics of buildings linked concrete projects.
- **Saturday, August 22, "Straw goes Social":** presentation of projects incorporating collective subjects, sharing knowledge and resources. Round tables in the afternoon around the theme of transfer of knowledge and skills.
- **Sunday, August 23, "Straw goes Urban":** discussion will be accompanied by presentations on the technical aspects, limitations and solutions, rules, public market and prefabrication systems. In the afternoon, professionals can show their own construction methods.
- **Monday, August 24, "Straw is shared":** how is the straw construction developing and relying on networks? How can these national networks contribute to the professionalization of each sector? What is the perception of each country on this? What are the points of convergence on the regulations of each country?
- **Tuesday, August 25, "Tour"** for those who did not participate in the visit of public and private buildings Thursday 20 visit.
